Rhyming Words Activity Sheet

Instructions

1. First, look at each picture pair with your child and explain that the words rhyme because the end of each word sounds the same.
2. Next, cut up the sheets into individual pictures and shuffle them. Then ask your child to help you sort them into rhyming pairs again.
3. Finally, cut up the words below and help your child put the correct word under each picture. Draw their attention to the fact that each rhyming pair ends with the same letters. Your child will need to be familiar with letters and their sounds for this part of the activity.

You could also mention that rhyming words don't always have the same letters at the end but the letters at the end do always spell the same sound.

You might need to repeat this activity a number of times before your child masters the idea.
